

Errata - Supply Chain Science

Page 3, Figure 0.1: The labels “Prototype line” and “Production line” are reversed in the lower right hand graph. It should look like:

Page 41, line 20: “ $PT/2+2=3PT/2$ ” should read “ $PT/2+PT = 3PT/2$ ”

Page 125, line 24: “ $2.33(3) = 19$ ” should read “ $12 + 2.33(3) = 19$ ”

Page 187: The principle should read

Principle (Multi-Echelon Inventory Location): In a multiproduct, multi-echelon supply chain with an objective to achieve high customer service with minimal inventory investment, a low volume, high demand variability, and/or high-cost part should be stocked at a central (high) level, while a **high**-volume, low demand variability, and/or low-cost part should be stocked at a local (low) level.
